-Linux(Ubuntu)
-Object-oriented Programming
-Postman, Swagger
-Azure , Jira , Trello
-Firebase

Personal :
-Teamwork
-Decision making
-Fast Learning
-Flexibility
- Work under stress
-Familiarity with code versioning tools

Projects

Super Fawry Admin Panel present
A control panel that allows the admin to follow up on the work of employees in various branches, send them alerts, get their daily reports, and follow up on customer requests and approve or reject them.
Responsibilities:
- Support the Super Fawy team to improve the UI and add 3+ new parts to the dashboard to facilitate the employee's work.
Using Angular 11, PrimeNG, and SCSS.

Super Fawry App present

A website that allows Fawry Plus employees in all branches to practice their work, record customer reports and new customer data, and send daily reports to managers.
Responsibilities:
- Support the Super Fawry team in enhancing the UI and adding 4+ new features as the business needs.

Technologies: Angular 14, PrimeNg, and SCSS.

I-Score Gate present

Admin System to enable the company to put its terms and conditions and specify questions to reflect in another application and the dealer answers it and based on his score the company decides to work with him or give him the goods he needs.
- Working with Fawry's data Science Team in developing the application.

Using Angular 14, PrimeNg, SCSS, and BootStarp.

Caruloo System Jul 2023 – Dec 2023

Comprehensive car management platform that facilitates seamless transactions between companies and individuals looking to buy or sell vehicles. This system serves as a centralized hub where various campaigns and users can effectively market, browse, purchase, and manage their automotive assets.
Responsibilities:
- Designed the website with native HTML, Tailwind CSS, and JS.
- Developed the dashboard with angular 17, and Tailwind CSS.
- Obtained Angular 17 new features, such as signals.
- Used socket.io to apply real-time notifications in all sections of the dashboard.

Technologies: Laravel, Angular 17, Tailwind CSS.

Lahza News Mar 2023 – Apr 2023

An Egyptian website that can accommodate more than 500 users and provide them with up-to-date news on a 24/7 basis.
-Utilized the ng-share buttons to share the news across 3 social media platforms, namely Facebook, WhatsApp, and Twitter.
-Handled Angular Universal to optimize the website for Google search engine visibility.
Technologies: Laravel, Angular, Ng-Bootstrap, SSR.

Top Shoes Oct 2022 – Nov 2022

An online e-commerce website to enable 500+ users to order shoes and bags.
-Created 10+ shared components to use in different parts of the website.
-Generated 15+ services to exchange data over the website.
Technologies: Laravel, Angular 12, NG-Bootstrap.

E-Learning May 2022 – Jun 2022

An education website to allow 10+ students to enroll in courses.
Technologies: NodeJS, Angular13, Angular Material, Bootstrap5.
GitHub repo:https://github.com/Nada-22/E-Learning.

Movies Mar 2021 – Apr 2022

Developed a movie website to enable 20 users to stream films and TV shows.
Technologies: Angular, HTML, CSS, BootStrap 5, API's.
GitHub repo:https://github.com/Nada-22/movies.
