Senior Front End (Angular) Developer

We are a Blockchain Analytics company working on exciting projects in a cutting-edge space. We are looking for a talented **Senior Front End Developer with 3+ years of experience.** If you enjoy being continually challenged and you enjoy working with blockchain applications, we need you! We are willing to take a Junior developer who is exceptionally smart and learns fast.

You must have **very good English communication skills**. If you do not, we cannot hire you.

Required Technical Experience:

- **3+ Years of Frontend Web Development Experience**
- Comfortable working with all aspects of software development such as Defining Feature Specification, UI\UX Design, Software Architecture, and Implementation, and **High Coding Standards following the Clean Code Principles**.
- Possess strong programming skills and solid computer science fundamentals, including but not limited to **Software Engineering, Programming Patterns, and OOP.**
- Proven Styling Experience (such as CSS, SCSS, Animations, Angular Animations)
- Proficient with Reactive Programming (RxJS, NgRx, Redux Pattern)

Preferred Technical Skills/Knowledge:

- Experience with NX is a big advantage.
- Source control: Git & GitHub
- 1+ years of Hands-on Experience with Angular 4+ up to the Latest **Angular** 16
- Experience in UI/UX design is helpful as you may occasionally be asked to make on-the-fly decisions that reflect the needs of the personas we build for.
- Technical understanding of how cryptocurrencies work, specifically Bitcoin and Ethereum.

Bonus points for experience in Graph visualization.

We will want to see examples of your code, so please provide links to public repositories;

Be prepared to do a take-home coding exercise.
